

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): A method of relieving a headache in a patient comprising the steps of:

- mounting a non-invasive nerve stimulation device onto the ventral side of the wrist;
- generating a stimulation signal; and
- delivering the stimulation signal to the ventral side of the wrist.

Claim 2 (original): A method of relieving a headache in a patient comprising the steps of:

- mounting at least one electrode onto the ventral side of the wrist;
- generating a stimulation signal; and
- delivering the stimulation signal to said at least one electrode to stimulate the ventral side of the wrist.

Claim 3 (original): The method of claim 2 wherein said mounting step includes providing a wristwatch-like housing carrying the electrodes, and providing securing means for mounting the housing onto the wrist, with the housing having a circuit means for generating the stimulation signal encased within the housing.

Claim 4 (original): The method of claim 2 wherein said delivering step comprises delivering an intermittent stimulation signal.

Claim 5 (original): The method of claim 2 wherein said delivering step

comprises delivering a continuous stimulation signal.

Claim 6 (original): A method of relieving a headache in a patient by stimulating the median nerve and associated nerve structures in the wrist of the patient with electrical energy.

Claim 7 (original): A method of relieving a headache in a patient comprising the steps of:

- applying an electro-acupuncture device to the wrist; and
- stimulating the wrist with the electro-acupuncture device.

Claim 8 (original): A method of relieving a migraine in a patient comprising the steps of:

- mounting a non-invasive nerve stimulation device onto the ventral side of the wrist;
- generating a stimulation signal; and
- delivering the stimulation signal to the ventral side of the wrist.

Claim 9 (original): A method of relieving a migraine in a patient comprising the steps of

- mounting at least one electrode onto the ventral side of the wrist;
- generating a stimulation signal; and
- delivering the stimulation signal to said at least one electrode to stimulate the ventral side of the wrist.

Claim 10 (original): The method of claim 9 wherein said mounting step includes providing a wristwatch-like housing carrying the electrodes, and providing securing means for mounting the housing onto the wrist, with the housing having a circuit means for generating the stimulation signal encased within the housing.

Claim 11 (original): The method of claim 9 wherein said delivering step comprises delivering an intermittent stimulation signal.

Claim 12 (original): The method of claim 9 wherein said delivering step comprises delivering a continuous stimulation signal.

Claim 13 (original): A method of relieving a migraine in a patient by stimulating the median nerve and associated nerve structures in the wrist of the patient with electrical energy.

Claim 14 (original): A method of relieving a migraine in a patient comprising the steps of
applying an electro-acupuncture device to the wrist; and stimulating
the wrist with the electro-acupuncture device.
